8 CASI report

CASI hosted a **training webinar for event officials**. Several GAC members attended the webinar, but for those who missed it, you can view the video recording here:

[Documents & Training Material | World Air Sports Federation](https://www.fai.org/casi-documents)
<https://www.fai.org/casi-documents>

CASI updated its **Jury Guidelines** document, and it was approved at the meeting in Saudi Arabia (in November). Once the document is finalized and published, it will be available under Other CASI Documents here:

12

8 CASI report

Update of the General Section – some of the changes for 2025 include:

Clarification that all sporting codes (with some exceptions) refer to **crewed activity** (GS 2.1.1) I suggest this change, as the proliferation of uncrewed vehicles has caused some people to challenge whether records in Section 2 could be attempted without a pilot aboard. I suspect the same could have been argued for GAC competitions.

Reporting on protests during an event (GS 6.3.2) – The President of the Jury must now send their report to the Event Director within the time period defined in the specialized sections of the Sporting Code (the term “without delay” was deleted).

Urgent action item for GAC: we must ensure that we have a specified time limit in our rules, as the term “without delay” is no longer acceptable.

Clarification of **time limits for filing appeals** (GS 6.4.3) - if the deadline falls on a Saturday, Sunday, or Swiss holiday, the time limit is extended until the next working day.

https://www.fai.org/sites/default/files/documents/fai_sporting_code_general_section_2025_v1_0.pdf

13

RMK/

A implementation of a 2 hours time frame for submission of protest reports by the jury president to the event director has been agreed.

9 Future international competitions

The GAC Bureau likes to discuss and implement a fixed timeline for the « bid process » :

202(x-2) = PRELIMINARY BID

By a letter of intend a NAC announces the will to organize a "Wxxx"

202(x-1) = FINAL BID * LOCAL RULES

Must show details, like location, fixed timing, financial plan

202(x) = championship takes place

Anticipatory this would result in the following mentioned presentations.
One of them – for 2027 – might deviate as they are not ready yet.

Organization

The 4th FAI World Air Navigation Race 2027

Ralf Grunwald

REPRESENTATIVE OF THE GERMAN AERO CLUB

will be organized jointly by the German Aero Club and the Aero Club of Switzerland. We were able to recruit specialists from both countries to take responsibility for this event.

Maurice Ducret

REPRESENTATIVE OF THE SWISS AERO CLUB

Team

We are already in contact with the people in the list below.
However, we are only showing a first suggestion here.

Function	Name
Competition Director	
Int. Chief Judge	
Local Chief Judge	
Route Planner	Arnold Grubek
Scoring Manager	Thomas Weise
Jury	Armin Züger

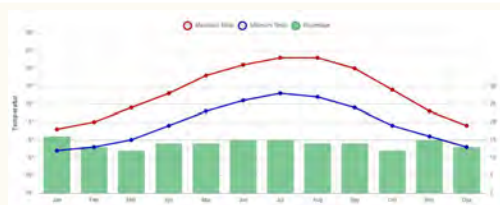

Proposed Dates

After a thorough examination of all boundary conditions, such as the weather situation, holidays and public holidays, we have considered the periods May to June or September.

Dresden

Stuttgart

Airport Options (currently under investigation)

Airport Leutkirch EDNL (Baden-Wuerttemberg)

Airport Zwickau EDBI (Saxony)

Both airports are well experienced with international competitions. The surrounding landscape is varied and interesting. We are currently trying to check the necessary resources and facilities for both options.

39

Map example

As you would expect, we think we have the best aeronautical charts available for the competition.

40

What to expect:

A wise politician from Germany once said: "If you have visions, you should definitely see a doctor". Nevertheless, we have a vision for this FAI World Air Navigation Race Championship.

- A fully digital world championship (or very close to it)
- To experience and enjoy the original idea of the ANR

Hope to see YOU soon!

43

Annual Subscription options

Starting with the discussion about competition maps, Thomas Weise (operator of the map server) developed a possibility to buy an annual subscription to create such maps. The server costs currently amount to about € 500,- per year. With the income from these subscriptions, we are able to adjust the performance of the server to the required level.

Available Subscriptions:

- Annual subscription per country € 150,-
- Annual subscription per person (up to 3 clients) € 20,-
