**Note:** 2013 DIPC4, 2014 DIPC5 and 2018 WCIS freestyle with music are available ONLY for FAI judge training courses and evaluations.

Anyone conducting a course or evaluation should communicate with Zeljko Tanaskovic and the ISC Judge Video Librarian to request videos, data, and documents.

Important! Course instructors need request materials at least 4 weeks before their course so materials may be provided on time! These files are large. Even though competitions can now be made available via internet download (with lower resolution videos), a strong internet connection is required for a course instructor to be able to download competitions in a timely manner. Depending on course needs, it still may be necessary to ship a hard drive with needed content.

There are currently four (4) "shuttle" hard drives:

- one (1) 1 TB HD
- one (1) 500 GB HD

**Discussion Points for 2025:**

- 1) For indoor performances performed with music, why is the music missing from the videos provided to the ISC Library?
- 2) There should be a segment of the ISC Library for materials reserved for and available only for Chief Judges of Training, judge training, and courses. If there is content specific for use in judge training courses, it is recommended to provide it to the ISC Library so that any Chief Judge of Training will be able to request it.
- 3) Regarding archiving Competition and Performance records: Currently, the ISC Library still does not have any media nor documentation of Competition and Performance records.

**Conclusion**

Competition videos, data, and pertinent documents are essential for developing judge skills and improving scoring systems as well as for competitors and future competitors to develop their skills. These materials are reliably available through the ISC Judge Video Library. And we want to preserve history.
